Case: KY Power 2017-00179

COMMENTS: I am a single mother
of a six year old I have limited
financial resources. I can NOT afford
any increases in ~~cost~~ utilities. I already
struggle as it is. I've already been
charged my deposit several times
due to the fact that I do struggle.
I live in an all electric residence
and without electric I would not
be able to continue to function
in our home. Electricity has become
a necessity for all families and it
is barbaric the amount we have to
pay to try and keep it. Please
I beg of you NO further increases!!!

Case: KY Power 2017-00179

COMMENTS: I am against any
more raises on utilities. The Average
home in the area I live in around 75%
of people cant pay their Electric bills
Now you are going to cause more
people to be homeless. I ~~really~~
really hope you consider that
before you raise any more utilities.

Thank you

Case: KY Power 2017-00179

COMMENTS: Recently the Electric Company
said my bill was running too low so they
changed my meter out and sent me a
estimated bill of 600.00. I seriously
doubt that they would have done this
if my bill was higher than normal.

Case: KY Power 2017-00979

COMMENTS: The vast majority of Kentuckians struggle to make it throughout the year. The winter months especially when electric bills soar above and beyond what we are able to pay. I, myself am a single mother of 3 and without assistance would fail to have electric for my family. If the rates of electric increase, it would be a hardship on everyone and one, I think, the people of Ky would be unable to make it through.

Before raising rates I think you should consider the damage you would be doing to communities and families all across an already struggling state.

Thank you

RE: Comments on case #2017-00179

Dear Dear Kentucky Public Service Commission:

I am a resident of Pike County, Kentucky and a Kentucky Power customer.

I am very concerned about Kentucky Power's punishing proposals to raise our rates while rolling back energy efficiency programs.

Eastern Kentuckians want fair and affordable energy bills. We want Kentucky Power to do more not less - to help customers fix up homes and businesses to save energy and money And we want corporate accountability: AEP and Kentucky Power executives and investors should shoulder a fair share of the risk and costs.

Kentucky Power's proposal takes us in the wrong direction on nearly all those counts. It leaves eastern Kentucky ratepayers - not shareholders or executives - on the hook to pay for AEP's bad deals and bad decisions in other states. It hurts people on low and fixed incomes. It will send our monthly energy bills soaring, when they are already unacceptably high. This proposal delivers a body blow to our region at a time when we are struggling on so many levels to stabilize our communities and build a brighter future together.

The Kentucky Public Service Commission must ensure that Kentucky Power's rates are fair and necessary, and that they don't unfairly punish low and moderate income people. For all those reasons, you must reject Kentucky Power's proposed rate increase. I'm another Kentuckian who believes the PSC should require Kentucky Power and AEP to shoulder their fair share of the risks and costs of bad business decisions, and should not allow them to reap excessive profits while our people suffer.

We need your help and leadership to examine the unfair impact that many energy and consumer decisions have on low-income communities and communities of color in Kentucky. Here in eastern Kentucky and across our commonwealth, we can create good jobs and ensure affordable, reliable and clean energy. But we can't get there by doing things the way we've always done them.

And we need your help.

Sincerely,

COMMENTS:

We would appreciate if the electric bills would not go up. In our area people can't afford a increase. Some people would have to go without food or medicine to pay the electric bill.
Thank you
