	an increase	43.47
		124.19
		164.66

Case n: 2017-00179

Dec. 13, 2017

To: Public Service Commissioner;

I'm writing this letter to you concerning our high electric bills. The Electric Company, A.E.P. is requesting an increase in the rates + they just received an increase a few years ago. It increased about 18%, at that time, we were only paying on school taxes and 2 other small charges which I didn't mind. and when they requested an increase in the year of 2015- or 16- I had no idea they would request such an increase. But they did + they got it. at that time they slipped the request by us. But this time people is aware of the request, and there is a lot of opposition.

I am an elderly lady 71 yrs. I draw less than \$18,000 a year, and I am still paying on my house. I pay \$462.00 House payment^{amo}, Medicare 130.00 a mo. House In. 80.00 amo, Garb. 13.00 amo. Water 19.00 amo. Life In. 57.44 amo. Phone Bill 26.00 - Dish 26.00 + have doctor bills to pay + buy a few groceries. After my house payment - my next biggest bill is Electricity it has almost doubled. Medicine ^{over} 100.00^{mo}

It's not right having elderly people such myself worry about doing without food or my medicine.

I have both kind of arthritis, ^{my} diabetic, so I have to be careful about my food intake.

I know Companies don't worry about people like me. They just out to make big money. And I know you have a big responsibility on your shoulders, But please think about us elderly & poor people when you make your decision.

Thank you.
