COMMENTS: I feel a 17% rate increase is  
not justified. It seems to be all about the  
shareholders, never the consumer. Even though  
they are making generous profits, ~~even~~ enough  
never seems to be good enough. Always blaming  
infrastructure improvements while paying massive  
bonuses to the corporate board members. I am sure  
that the letter is for naught, but if an increase  
is approved, it be held at no more than 3%.  
Please consider the struggling working man out  
there
