RE: case 2017-00343

Dear Commissioner Mathews,

I wanted to call your attention to the sizeable rate increase (72.98% on an "average" bill) requested by Commercial Propane Service, LLC DBA Bright's Propane Service, Inc. the details of which can be found in the attached document.

Proposed rate increases of 64% are outrageous particularly for retirees like me who live on a fixed income. Even during the summer months when we our propane usage is negligible, we'll be charged \$30 every month - up 64%! These are unrealistically large increases and require your immediate attention.

Please also look at the NEW fees that shift the cost of maintenance to their customers – see Meter Testing charge, Service Investigation charge, and Service Assignment charge. Increases of 600% for disconnect and reconnect seem wholly unjustifiable.

807 KAR 5:076 Alternative rate adjustment procedure for small utilities, Section 9 Test Period states "The reasonableness of the proposed rates shall be determined using a twelve (12) month historical test period, adjusted for known and measureable changes, that coincides with the reporting period of the applicant's annual report for the immediate past year." Can you confirm that the proposed rate and fee changes and additions are indeed reasonable?

I need you to act in the best interest of our small community and roll back the requested fees from Commercial Propane Services.

Thank you, in advance, for your attention to this matter.

Yours truly,

Larry Fitch
