Re: Case# 2018-00005

Dear KPSC:

I urge you to provide more information to the public regarding smart meters, most especially in the matter of documentable costs and savings, and secondarily, what is being done to protect the public's interest in their privacy.

Thus far, your justification for expenditure appears to be a moving target. I must believe that LG&E and their expert staff can do a better job of communicating data to the public, and would not be adverse to withdrawing the plan if the refined numbers do not bear out initial claims.

Sincerely,

Stephanie Reese CPA
