Will you please consider our problems here in Martin Co. dont believe these officials saying our water is Ok. Callahan will be out of office soon, and he is not going to keep with our water problem. Keris Maynard also im uneducated, say it how a little common sense, to consider what is right or wrong it can see, when it go to the bath room, and see the bottom of the commode dark and some times theres a bad odor, it can clean when it has to but a lot of old folks are not able, over all this we have to buy water to cook with and brush our teeth. im having a awful time with body itching, all of my hair is falling out, could it be what they are putting in this water, im not saying this water is the cause, when we bath do we feel like were clean? No it just keep itching and scassing, thats not good health practice, do consider our children, this filthy water will destroy their health, who wants to see folks look and smell like animals. I cant gain much for my self, but it feel for other folks, im 92 yrs old, so im no busy body it just want to see justice, please keep the Martin Co's. Thank you
