Case # 2018-00017

I live in Inez, Ky (Martin Co.) and are on a fixed income, I barely make it from month to month now, if it wasn't for RAMP or other places giving out food and sometimes water I and others in this County would not make it.

So if our water bill's go up I like many would have to have it disconnected because I could not afford it.

If this County keeps raising Rates, Fees & Taxes I will have to move out of the County I love and was raised in.

I understand this County needs help because of local officials mismanagement but not on the backs of the taxpayers, with the previous rate hike I have had to cut down a lot on water usage to keep my bill at the minimum, I can not handle another rate hike.

We once was one of the leaders of coal production and the state of Kentucky has prospered from our family's working in these coal mines but now that coal is no longer coming out of our County they could care less about us.

So please find another way to solve this problem other than raising rates we can not afford high rates.

please don't make the County that I love a ghost town because people can't afford to live here.

Thank you
Kim C.
