PSC Frankfort Ky

Does an executive of KAWC (maybe Nick Rowe) have fear the PSC will not grant them another unnecessary rate increase. Two other minor executives at KAWC have sent an editorial to a local paper attempting to explain what and why a rate increase is wanted, not needed.

How many KAWC facilities are not reliable?
KAWC did not say.

Quality of water they deliver must meet stringent standards KAWC says. KAWC is always sending information on their water quality with our bills. They run ads on local radio telling rate payers about their excellent water quality. Rate payers pay for this stuff. Can their water quality get any better do to another rate increase.

KAWC will not let their water facilities fail so said the two editorial writers. KAWC wants this latest rate increase to prevent failing. KAWC has already received enough rate increases to keep their facilities in great working shape. Where have KAWC spent all the money from other rate increases?

Their rates never reduce. Increase stay on our bills for ever. KAWC completes an upgrade, etc, but when it is finished they keep receiving money from rate payers. Why?

Ex mayor Grey said KAWC takes our money to buy other water facilities in other location and we have to pay for them.

KAWC states they have over 3000 fire hydrants. Where are they. Just how much maintenance does a hunk of cast iron need?

In Lexington fire hydrants are rented to the town by KAWC. They collect enough rent money to pay for maintenance. KAWC removed a hydrant from an area where I live. I tried to find out if they were still collecting rent from local government. No one gave me an answer. The hydrant did come back.

How many times and how often has KAWC gotten rate increases to upgrade the Ky River Station in Fayette County? KAWC is again asking for a rate increasing more upgrades to the Ky River Station

KAWC claim there are over 2000 miles of water pipes. Where? Only 9.5 miles have been

replaced. What has happened to all the money KAWC has received in the past to replace pipes if only 9.5 miles has been replaced?

Are KAWC rate payers paying the salaries of meter readers. Haven't seen any on my street lately. I did catch KAWC estimating my bill for a long period at one time. At that time I was paying KAWC to send a meter reader to my house. What did KAWC do with the money I gave them to send out meter readers?

A Lexington, Ky, police horse stepped into a hole and injured a rear leg. The hole was there KAWC had not put a lid back on it. KAWC said they do not track their holes for lids. They want the rate payers to notify them when a lid is missing. Now they are asking rate payers to work for them free. (Neighbors said the lid had been missing for weeks).

Rate payers can only put up with so much corporate greed

The K in KAWC stands for "Kash"
