KAWC wants more customers dollars, but why?
I do not see any reason in the legal notice ad
KAWC placed in the Lexington Herald-Leader.
They only say they are going to do it.

KAWC gets free the H^2O from the Kentucky River
and other sources in Kentucky and Ohio. They do
not have to manufacture it. It is there for the
taking.

Why is increase required? Maybe the higher ups
at KAWC and other water plants and sewer
plants owned by American Water need a
bigger bonus and a raise again this year.

KAWC should be ordered to repair all of their
own leaks before they get any type of a rate
increase for anything.

KAWC customers pay for water that comes through own meters. If our line from meter to house leaks/breaks, we must pay to get it fixed/replaced. KAWC should fix/replaced their leaking lines/pipes out of their own pockets instead of making customers pay for it through a rate increase. What is theirs is theirs and what is ours is ours. KAWC thinks what is theirs is ours when it breaks or needs to be replaced and makes customers pay for it.

The more unrepaired leaks in KAWC lines and pipes means they have to draw more water from the river. The more they draw the more customer dollars they take from customers. What a racket!

KAWC have become the retail gas stores of utility companies. Retail gas stores are always increasing the price of gas just because they can. KAWC does the same thing now everytime they can.

PSC, just say no.
