RE: Smart Meters

I do not consent to the installation of a 'smart' meter on my home, as I believe that such a meter is an entirely illegal intrusion upon my privacy and a threat to my health. As it is a surveillance device and a Class 2B carcinogen.

I am further requesting the Commission to adopt a "community opt-out" so that entire neighborhoods can be kept safe from unwanted dangerous electromagnetic radiation. I also believe that no unreasonable fees should be imposed upon anyone requesting to keep their analog meter.
