PUBLIC SERVICE
COMMISSION

1-22-18

To the Public Service Commission

I'm a customer of the Kentucky Utilities Company. I pay almost \$400.- a month to keep my lights on and my electric appliances running. A service provided to me by the Kentucky Utilities company. I think that is too much to pay already and they want to raise it more. I have a hard enough time paying my bill as it is. They want to make it harder on their customers. They are not thinking about us. They are however thinking about lining their own pockets. I ask you to deny their order for the KU Certificate of Convenience and Necessity. It is not a necessity. What they want is their workers to have the ability to sit in their trucks and be able to read our meters. Convenience. Yes convenient for their workers. But not

1.22.18

convenient for the customers
harder on all of us. Instead
convenient for their workers all
they have to do now is drive up
to our houses get out of their trucks
and walk maybe 10 feet or less
to read our meters now is that
to much to ask. The meters that
we pay for. Let them earn their
money. Any other person has to
work very hard for their pay check.
I think they have it pretty easy.
I ask you again to reject this order.
But if you by some chance you
feel that you should make it
harder on the customers I ask that
you deny this ability to start
this change by February 9, 2018.
Instead give their customers a
chance to get prepared for it by saving
some money. Instead make this
order not to become effective
until September 1, 2018.

Thank You

1.22.18

Thanks again for your
consideration on this matter.

Thank You
Jerry Randolph
