Re: Objection of Cell Tower in Old Landing, Ky

Legal Land Description: 400 Evelyn Road, Beattyville, Ky (docket #2018-00384)

Dear Sir:

Please note, as a resident of Old Landing, I am against the development/construction of a cell phone tower in Old Landing for the following reasons:

1. I am concerned about the long term, Environmental/Health concerns a cell tower could have on the residents. I am sure you are aware of the numerous studies, citing environmental/health dangers from cell towers. World Health organizations have shown that children exposed to cell phone radiation have experienced severe health effects including increases in rates of asthma, autism, ADHD and other ailments. Many in our neighborhood have pets and several varieties of wildlife make their home here, we are concerned the effect a cellphone tower could have on them as well. Has AT&T done an Environmental/Health impact study concerning the building of a cell tower, specifically for Old Landing residents?
2. What effect will a cell tower have on property values in Old Landing? Has AT & T done any research on the effect a Cell tower will have on property values in this area?
3. Should a cell tower be built so close to a residential area? Is this the best location for a cell tower in this area of Lee County? The particular site has residents within a few hundred feet on all sides. Shouldn't cell phone towers be at least 2 miles away from residents?
4. Cell phone tower facilities require maintenance that may be performed at any time day or night. We would expect to see an increase in trucks and service personnel that will be an additional unnecessary public nuisance. The operation of a cell phone tower we expect would add noises to a generally quiet neighborhood and also add lights that will be on 24/7 days a week and interfere with the view of the natural beauty we all enjoy in this neighborhood.

I expect these issues to be addressed and answered as soon as possible. Please reconsider the location of this cell-phone tower.

Regards,
