Subject: Graves County Water District proposed rate increase

I have a 2" water meter to enable my small backyard business. The business is seasonal, meaning very little usage 3/4 of the year. I paid for the cost of the meter and enjoy the benefits of an adequate water supply when needed, although rarely exceeding the minimum. For the 12 months of 2018 I exceeded the minimum charge 1 month. The proposed 85% rate increase for 2" meters is obviously not in line with the other meter services and will be a hardship for me. I can't speak for other commercial customers but most likely there are others that will be adversely affected as well. As you study the proposed increase, please consider my comments.

Sincerely

Rex Beckham
