PUBLIC SERVICE
COMMISSION

Hello Public Service Commissioners:

I am so very tired and beyond frustrated by having those who are supposed to protect my best interests provide instead for the "big dogs." I pray to God you commissioners do not fall into that hell-hole by catering to commercial power generators.

I strongly join with the multitude who support a one-for-one or better credit for solar providers who contribute to the electric grid. I have a house that is ready-made for solar generation of electricity. Do not make it more difficult for me to be able to do so by squelching the independent spirit of people like me -- the essential spirit our commonwealth and republic were built on.

Without the backbone to stand for the little guy are you not guilty of selfish pride at the least, or of feathering your own nests at the worst? I wish you genuine peace of conscience by encouraging, not discouraging, the self-reliance of folks like me.

I will see you November 13th. A reply would be greatly appreciated.
