Subject: PSC Case No. 2019-00128

Dear Mr. D'Ascenzo:

Your application for an electric service area boundary change contains all of the pertinent information. However, your maps are inadequate for our map files. The PSC maintains paper map files as the legal documents for the electric service area boundaries for Kentucky. For this case, you need two different maps. See Application, Exhibit 1.:

- (1) Utility signed copies of quadrant (Key) map showing revised territorial line with a note referencing the property/customer, and date of the territorial agreement. (2 paper copies required for filing)

This could be a copy of the last Burlington Quadrangle on file at the PSC (see attachment Burlington_19891026) with an arrow referenced by a Case Number and Owen Electric, as the new territory owner. It must be have a current signature and date by both utilities. Do not send this to the PSC electronically, since the map contains electric lines and is considered "sensitive" infrastructure information. Send two paper copies using the mail.

OR to meet this requirement:

Use the map sent in with Map #1 in the Reply to the Staff's Data Request (see attachment Map #1), and send in the entire Quadrangle at 1:24,000, signed and dated by both utilities. Do not send this to the PSC electronically, since the map contains electric lines and is considered "sensitive" infrastructure information. Send two paper copies using the mail.

- (2) Utility signed copies of site map (Plat) and/or territorial agreement showing original and revised territorial boundary. (2 paper copies needed for filing)
The map must include coordinates accurate to within 3 meters for at least four points on the territorial line. It is preferable that these points include the beginning and

ending points of the change. Utilize the Global Positioning System (GPS) with the coordinates based upon WGS84.

The coordinates in the response to the PSC's data request meet the requirement for accuracy (FYI: 6 decimal points is submeter).

NW Corner - 39.025060, -84.726191

NE Corner- 39.025060, -84.725962

SE Corner - 39.024793, -84.725968

SW Corner - 39.024792, -84.726191

That text needs to be placed on the map on page 10 of the application (see attachment Map_Application,_p10). You can place the GPS coordinates in the margins and then get current signatures and dates by both utilities. Do not send this to the PSC electronically, since the map contains electric lines and is considered "sensitive" infrastructure information. Send two paper copies using the mail.

If you have any map questions you may contact:

This is the map which must be annotated with the boundary revision in Case 2019-00128 and signed and dated by both parties. The PSC needs a paper copy; do not submit it electronically since the map shows infrastructure.

If your GIS person has any questions, please contact me ...
