Re: Case No. 2019-00389
Ky. Power rate increase request

To Whom It May Concern,

I urge the Commission to reject Kentucky Power's request to increase customer's bills to pay for a Selective Catalytic Reduction System for the Rockport, Indiana generating plant.

Customers should not have to pay for environmental equipment for a plant in another state and owned by Indiana-Michigan Power who is a division of American Electric Power, NOT Kentucky Power owned. The majority of Kentucky families are low income and barely make it from paycheck to paycheck now without another increase to the power bill.

Please do not vote on this without considering the customers as well. Kentucky citizens are counting on you to not approve this increase.

Thank you
