to whom it may concern;
as a customer

I feel the OC Water District ~~is~~ shouldn't raise the water rates that much. I have told them the last 3-4 months that ~~THEY~~ have a leak or are overcharging me. My water bill has gone up 25.3 times what it was. We have no leaks because my husband has checked everything.

I am disabled and live on a fixed income and can't do what I used to. Also, on April 8, 2020 there was a man in a service truck that came out from behind Daddy's house. The truck had Ohio County on the side. The water district hasn't said if it was one of their workers but if it was he was way off the water lines and meter. I am not

using from around \$30.00
worth of water to around
\$80.00 worth. My family
hasn't grown.

This is a poor community
and while this pandemic is
going on to raise the rates
in my opinion would
be price gouging.

Calvin Sisk

Please make them fix
this problem I have outlined
