Case No. 2020-00174

Dear Sir,

We are in an economic crisis, most people are having a hard time paying their bills. Most people living in this area are either retired or unemployed.

The power company does not take any consideration toward their customers.

Why should we have to pay for improvements to the company? They will see an increase to their company.

We hear at times of donations to colleges and etc. I feel they are getting the credits, when in truth, the customers are supplying the money.

Please consider this as a no
to an increase in rates.
