Re: Broadband in Western Kentucky

Commissioners,

I am writing to show my support of Kenergy's broadband deployment project. I want regulated electric cooperatives to be able to provide high-speed broadband services to my community, just as municipals and TVA cooperatives do today. Our community has limited, if any, availability to reliable, high-speed internet. This critical infrastructure is essential to business, healthcare, education and quality of life. My only option for internet in my area is satellite which is more expensive for very limited service.

Extending broadband services to rural areas is the modern-day equivalent of rural electrification in the 1930's. Electric cooperatives have existing infrastructure throughout our region, which makes a perfect fit

to be a broadband service provider.

I am requesting your approval of Kenergy's request for a waiver, which will expedite this project in a timely manner, ensuring electric cooperatives can secure financing for the buildout

.
Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Sincerely,

Donna J. Roberson

Our current internet provider has ongoing issues with their infrastructure as they are not investing in the maintenance. Our internet is down a substantial amount of time monthly and performs extremely slow most of the time when it actually is working.

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

The area of southern Hancock Co., where we live, high speed internet is almost non-existent for a lot of people. My sister for one and another neighbor and I am sure many others, are having a really hard time with the online school from home. They are trying to use their phones but it doesn't always work well. So, I think Covid has brought to light the issues we have out here in God's country with slow or no internet access and in a lot of cases, no cell phone coverage either (me for example) and if people have no internet and no cell phone coverage, you can imagine the difficulties in trying to do online schooling, and we live all the way across the county from the schools, so taking the children to the school in these cases, is a problem too, as with my sister, who is trying to work too. We desperately need high speed internet out here! And it sounds like the Kenergy plan is the best idea I have heard so far. Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Sincerely,

Regina Smith
