Subject: Project Case 2020-00219

Dear Commissioners,

I am writing in support of the AEUG Madison Solar Project (Case 2020-00219), which would be located in Madison County outside of City of Richmond.

The timing of this project is critical to Madison County's recovery from the Covid-19 slowdown. With many local businesses impacted, the influx of construction jobs from this 100 MW project will not only help area residents who work in the construction trades, it will create a ripple of economy activity across the county from restaurants to the suppliers who will be providing materials needed by the project.

This project represents a significant private investment in our county. But it is more than that, it is an investment in the clean energy infrastructure that the companies we want to attract to Madison

County want to have power their businesses. It will be a local project that our high schoolers and college students can visit to learn about these new technologies, it will create revenue for longtime county families who want to hold on to their land.

Acciona has demonstrated that their intention is to hire local support and to use some of the revenue of the project to address local needs. This already started with their support of local groups including God's Outreach and Sustainable Berea.

I am confident that the company will work with their neighbors to address all concerns, and it begins with communication. I view this investment as a long term benefit to our county.

This project will be paying dividends for three decades, that's the exact kind of investment this county needs to make today to ensure a vibrant future.

I thank you for considering my comments and urge your approval of this project.

Sincerely,

Bruce Fraley
