PUBLIC SERVICE
COMMISSION

To Director:

Driving home from work one day last week, I noticed a sign on the roadside where I live on 2194 W, Hickory, Ky. It advised a cell tower is planned to be built on this sight. I asked around and sure enough a tower is to be built next to my home. I object to another cell tower being built in this residential neighborhood.

I love living in the country where everything grows green and beautiful and I do not want to take a chance of seeing crops die. I also do not want to look out my window and see blinking lights. We have a safe healthy environment and there is no reason to construct another tower. AT & T is surely aware of the dangers radiating from cell towers. Consider all these reasons and move the tower to an area where no people reside. The farmer who owns the land on the proposed sight has more land where the tower could be constructed not affecting so many residents.

Robert Puckett

Rochelle Puckett

The image shows two handwritten signatures in black ink. The signature on the left is for Robert Puckett and is a stylized, cursive script. The signature on the right is for Rochelle Puckett and is also a stylized, cursive script, appearing more fluid and elongated than the first signature.
