Case Number 2020-00270

Director:

There is a sign indicating a cell tower is coming to a farm near my home. I live at 1076 State Route 2194W, less than one-half mile from the proposed sight. The area is a beautiful residential area that is heavily populated with people who care about their houses,environment and health.

I have seen how these big companies who build the towers operate in other places where I have lived. These big companies like AT & T come in and erect a tower then walk away never to be seen again, proving they do not care what we want. If the company who is proposing to erect the tower cared about the residents who live on this road, they would have sent a customer representative to discuss their plans before now. There is no room in this community for similar action.

Please take your plans to a nonresidential area. I most definitely object to this tower being erected in our neighborhood.

Sincerely

Steve Hoyte
