To whom it may concern,

I am writing in regards to case #2020-00290 the increase they are seeking is outrageous and how can they choose different allocations for different areas if there is an increase it should be a flat rate for all and not pick & choose who gets the increases and by how much.

I think their figures are off and who monitors if they actually do improvements and how much they spend. I think it should be looked into to see if what they say is true and they not be allowed to implement rate increases of varying amounts it should be constant and even.

Thank you very much
Jesse Brown
