RE: proposed rate increase

Please know that my pension does NOT increase by your requested 10% just because you are greedy. I recognize that you have business and maintenance expenses but not likely at the rate you are requesting of me and like pensioners.

It would make some sense IF you were making efforts to use less costly raw materials (read coal) and incorporating solar, wind and water to generate the needed electricity. The people doing the work can be re-trained to make solar, wind, water generate electricity. It's not rocket science but it is GOOD science and for the good of the planet. Have you no public conscience?

Please consider those of us who must 'make do' and already are careful with the resources you generate. In this world of 'me, me, me' a little consideration goes a long way.

Margaret K. Davidson, rate payer on a pension
