

Re: case number ~~2020~~ 2020-00349

2-26-2021

Dear PSC + Office of Rate Intervention:

Thank you for allowing comments on the case number. Please consider the following:

- ① It's wrong to increase rates + disconnect fees when so many people are out of work and suffering from cold weather.
- ② LG+E/KU's proposal is unfair to low-income workers and communities of color who have been unfairly treated for four hundred years.
- ③ LG+E + KU should not change the rules to benefit from low cost solar.
- ④ KY Public Service Commission should hold accessible public hearings.

Please take my opinion into consideration. Best regards:
