Subject: Case 2020-00350

Please consider LGE request to raise all categories of our residential power rates significantly. If the our base or fixed rate keeps growing, what way will home owners have to conserve? If we have such high fixed costs, no matter if we use 0 or xxxxx kWh, we will be forced to pay our bills with no alternative available like using less power. Lge is always looking for more money from us customers but are they showing PSC how they are trying to save money?

Please say no to their 12% rate increase!

Vicki coombs

**Subject:** Case Number: 2020-00350 (LG&E)

To whom it may concern,

I am writing to share my strong objections to LG&E's proposed rate increase structure.

I am not opposed the actual increase, I understand we have some of the lowest electric rates in the country and the increase is probably needed. My objection is to the structure of the proposed increase. And I am extremely frustrated that this proposal sounds so similar to the one they proposed a couple of years ago when I wrote to you and Mayor Armstrong who used to be on the PSC to express the same concerns. Why are residents being burdened with having to write again with the same concerns.

First, given the extreme challenges that our community is facing right now, particularly low-income individuals, the reconnection fee should not be raised. Second, if there is going to be an increase, it should be an increase in the per kWh used, not the fixed fees, and third, they should be making it more attractive for customers to install and/or buy solar.

I encourage the PSC to vote down this proposed rate change. LGE/KU could achieve the needed revenue increase by increasing the per kWh rate, allowing customers to pay more when they use more. This is more fair to low income individuals who can choose to use less electricity if they need to in order to manage their budget. Additionally, this incentivizes energy efficiency which is better for everyone and decreased energy uses equals less pollution which is better our community's health.

Thank you for considering comments.  
Sincerely,  
Virginia Lee

State the nature of your concern: Regarding case 2020-00350 LG&E is going in the opposite direction from cleaning up the environment, but thinking only of how they can make a greater profit by inhibiting the development of the use of solar energy. Please do not let the penalize those who have invested in solar panels or are planning to do so. LG&E must change there practices to use more clean energy itself. Government and you are responsible for creating a more sustainable, healthy environment.

Have you contacted the utility about the problem: No

**Subject:** Case Number 2020-00174

I am a local solar owner of a historical home built in the 1880's our home has run its lights on Natural Gas, Coal, and the sun – I bring this up to make sure we think about the fact that energy changes.

As I understand LG&E as they operate today they are a monopoly who is instructed to produce power as cost effective as possible, great in theory except when we don't factor in all the information.

- 1) LG&E says I leach off the system as I don't pay enough to maintain the Grid – my excess energy goes 4 feet to my neighbor – give me the option to install a meter and charge him a "fair" rate they will buy it at .10 I have asked. They are not alone the Solar share program has

th

sold 5 grids and 65% on the 6 demand for clean energy is all over – were just blocked by a lack of a free market.

- 2) LG&E says that because of people like me those that can't afford solar have to pay my share, this hurts the less fortunate but also want to increase the meter rate, not allowing those who need to manage a tight budget fewer options to reduce monthly costs – so you cant have it both ways.
- 3) The cost of carbon is never factored in – this year the cherry blossoms are 10 days earlier then in record period, 65% of our country is in danger of water insecurity – so you tell me what is the cost of Carbon --- impossible to calculate but its not -.07 per KWHR.

Lastly Jobs – I started off in coal great paying job – I recently applied for a solar Job from a local KY company ---- you know what also it's a great paying job, solar in KY is hard, we have low sun production hours, a hostile utility with a magic cap of 1%, the rate should reflect the value we bring to Kentucky, the united states, the world – if you don't agree – let me sell my own production vs. purchase expensive battery storage systems that last 10 years, just so LG&E can fire up a very costly gas power plant to sell power that I have available and willing to sell.

Make solar fair.

Jason Cosman

**Subject:** Case # 2020-00350: Rate Increase shouldn't be allowed

Hey,

I am Michael Elder from the Mellwood Art Center which is on 1860 Mellwood Avenue, Louisville, KY 40206. I am writing to say that rate increases of this size should not be granted, especially as we attempt to recover from a pandemic, and that the attempt to shift more payments to fixed charges harms lower income people/businesses and discourages energy conservation. With the event industry being shut down for an extended amount of time, any rate increases would be very difficult to companies in the event industry and many other industries.

Michael Elder  
Administrative Assistant

cc <[jecorey.arthur@louisvilleky.gov](mailto:jecorey.arthur@louisvilleky.gov)>, Meeks, Reginald K. (State Rep.) (LRC) <[reginald.meeks@lrc.ky.gov](mailto:reginald.meeks@lrc.ky.gov)>, Harper Angel, Denise (State Sen.) (LRC) <[denise.harperangel@lrc.ky.gov](mailto:denise.harperangel@lrc.ky.gov)>

Hello Public Service Commission.

Please deny LGE-KU's request to raise flat monthly charges for customers. This kind of rate hike penalizes small households such as seniors, people who live in apartments, and people trying to control costs through conservation measures. **The 12% rate hike is not affordable for customers and is not equitable.**

It also penalizes people and businesses who have chosen rooftop solar, contributing to LGE-KU's renewable energy portfolio and maintaining cleaner air for Kentucky. Under this rate hike, net-metering of renewable energy would be rigged in LG&E's favor. It would sell customers' excess, daytime solar power to other customers for 4-5 times what LG&E would pay the solar customers who produced it. Then, LG&E would charge solar customers 4-5 more when they drew power at night or whenever they needed more power than they generated, slowing the payback on customers' solar panels

**The Public Service Commission needs to balance LG&E's monopoly powers and guaranteed profits with the reason it was created: to provide affordable, essential services to all customers.**

Thank you

**To:** PSC Public Information Officer <[PSC.Info@ky.gov](mailto:PSC.Info@ky.gov)>  
**Subject:** Case 2020-00350: Comments on LG&E PSC Rate Case

Dear PSC members and staff,

Case No. 2020-00350 is a PSC rate case by LG&E that includes proposing changing solar energy credits from the current 1 to 1 net metering to a much lower and more complicated reimbursement rate. In addition, LG&E is asking for 12% increases in both the fixed monthly fee and the residential consumption rates.

- 1:1 Net Metering is simple and fair.

I am the owner of a roof-top solar array. The proposed Time of Use provision and reimbursement system are unfair and complicated. I think that the current 1:1 net metering should not be changed. 1 to 1 net metering is simple and fair and allows more people to afford solar arrays. The current 1:1 net metering is fair since excess power is sent to the grid during times of summertime peak demand when electricity is more expensive to produce. Treating residential solar like wholesale power generators is not fair. Power plants require costly transmission lines across long distances to get their power to LG&E, whereas LG&E incurs little to no cost when my excess solar power is used by my very nearby neighbor.

1:1 net metering helps foster solar installations. This is needed to reduce the health and severe climate change impacts of fossil fuel generated electricity.

LG&E is proposing a complicated and unfair solar reimbursement system because they want to maintain a monopoly on solar generation. Accepting their proposal would unfairly restrict customers from choices to better control their electricity costs and work to make electricity generation and distribution more efficient and less costly.

- The proposed rate increases are too high.

LG&E is proposing a 12% increase for the flat monthly fee, and consumption fee increase of 12% for residential and 17% for commercial customers. These proposed increases are too high. The proposed increase in the flat monthly fee is especially problematic since a customer would have less control over their energy costs. Customers would have less incentive to invest in energy efficiency improvements and to decrease energy usage.

Thank you for your time and consideration.

Sincerely,  
Chris Dolan

**Subject:** Case number (2020-00350)

I am writing to say that rate increases of this size should not be granted, especially as we attempt to recover from a pandemic, and that the attempt to shift more payments to fixed charges harms lower income people and discourages energy conservation. Furthermore, an increase of this size is uncalled for in a time of almost zero inflation.

**Subject:** Case number 2020-00350

To the Public Information Officer,

My name is Marilyn Benner and I reside at 10502 Waterloo Way, Louisville, Kentucky 40223. I am writing to say that a rate increase of this size should not be granted, especially as we attempt to recover from a pandemic. The attempt to shift more payments to fixed charges compounds the struggles so many folks are facing at this time. There is enough stress on lower income people trying to make ends meet as it is. With many individuals losing employment during this year, raising rates only increases the hardship, delays stability and any relief from an already desperate situation for many. I do not see any justification for this rate increase at this given time and oppose it being granted.

Thank you for considering my opinion and my concern for my fellow citizen.

Sincerely,  
Marilyn Benner

**Subject:** Case Related Question

I'm writing you in regards to the proposed LG&E rate increases for both gas and electric services.

I haven't been able to find the specifics of what they are asking for the rate increase to cover but feel that the proposed increases are totally unjustifiable. Their cost of fuel is already an adjustable cost in what they charge consumers so that can't be part of the proposed increase. The same also applies to industries, the low rates for utilities has always been 1 of the reasons many industries have located here, raising the rates drastically will also drastically slow the increase of new industry coming to Kentucky.

Especially now when so many people are already suffering financial problems due to the ongoing pandemic it's hard to see how any utility could justify such a large weight increase.

It seems like rate increase requests from LG&E have become much more common and larger since they were purchased by PPL. I'm sure the shareholders of PPL love these rate increases and really don't care about the well-being of citizens of Kentucky. I'm not sure why PPL was ever even allowed to purchase the utility.

Hopefully the commission will also not see a need for these rate increases.

Sincerely,  
Mark Radell

**Subject:** Opposition to credit reduction for KU/LGE

Hello, this email is in reference to case numbers:  
KU 2020-00349  
KPC: 2020-0074

I am writing to express my opposition to a reduction of 80% in the KU/LG&E credit paid for rooftop solar power and a 75% drop in the KPC service area. These proposed reductions will make it uneconomical for my husband and I to install net metering for our solar. We are about to go on on fixed incomes and installing net metering on our rooftop solar would be an important way for us to keep the costs of living in our home down.

Please do not approve these reductions.

Sincerely,  
Linda Barnes

**Subject:** Case No. 2020-00349

As a taxpayer in Kentucky, and a KU/LG&E customer, I am against ANY proposed residential rate INCREASES.

1. The county is just coming out of a pandemic. The economy is just starting to recover. We as a county aren't exactly sure if we are on the verge of another strange of Covid-19. NOW IS NOT THE TIME
2. The government just passed a relief bill for American workers. Apparently, the country needed the support. Why are we trying to make American suffer again by increasing their electric bill? Some Americans are still recovering from the inability to pay their mortgage/rent, not having money for FOOD to feed their children. NOW IS NOT THE TIME
3. Why are KU/LG&E customers responsible for the upgrades? What were the company's profits over the last five years? What other options have been explored? How can KU/LG&E streamline their budget? Review their financial expenditures to reduce additional burdens on

their customers. NOW IS NOT THE TIME.

Thank you for allowing me to voice my input. I can be contacted at 859-492-1881.
