

Case number 2020-00174

To whom it may concern, I received an email that stated Kentucky Power was raising the power bill. I am on social security and only draw \$803.⁰⁰ a month. I am begging you to deny this raise, I am scared to death because my gas company wants a 58% raise. At this rate I will be writing 2 checks a month, one for electricity and one for gas. I was told from someone to conserve on power. Well right now I have heat set at 68 during the day and 64 at night. What more can I do besides die. So please I am begging you to stop this raise, please. Be on the peoples side not the company.
