**Subject:** Case No. 2020-00215

To the Kentucky Public Service Commission:  
I support the effort of Kenergy Corp. to ensure the availability of high-speed internet in all areas of Kentucky, specifically our rural communities. As a (parent/staff member/student) of the Daviess County Public Schools district, it is essential that we are able to connect all students to online learning and digital information, especially now as schools are conducting classes virtually. Every child has the right to a meaningful learning experience, and extending broadband services into the homes of every student is an important step in making that possible.

**Subject:** 2020-00215

I support broadband for rural areas. As a mother of three, who works from home, I am concerned for my job as well as my children's education which are currently dependent on faster internet. While we do have home internet, we are lucky to reach a speed of 1.5. This is inadequate when multiple people in the home will need access at the same time. There are not any better options in my area. I even bought a Hotspot from AT&T just for my kids school and it won't work here. While this is my specific need, so many others don't even have access at all. During this time, more than ever, internet is a necessity for all. Thank you for considering this option, I hope to see rapid results!

This is in response to seeking additional internet options in Rural Western Kentucky through kenergy. Currently we live outside Owensboro at the Daviess Hancock county line. We have been without home internet for 7 years since we moved in. GRADD rural internet service is unable to provide service to our home due to location of a tower, satalite internet is not available on our road either, hot spot or tethering off a cell phone is not available at home due to lack of reception of cell towers. The lack of internet has impacted our families education, ability to work from home, even our health without the option to participate in telahealth visit from home while Sick during office closures.

*To Whom It May Concern,*

*I work for the hospital in IT and have the opportunity to work from home, which is very important to me at this time, but I live in rural Hancock Co, KY and the only choice I have for internet is a satellite company, which we all know is not dependable at all. During this pandemic I've had to go into the office to work. My grandkids cannot do their school work due to the slowness of my internet.*

*I feel this opportunity would greatly benefit my county.*

*I am sending this letter in support of Kenergy to provide high-speed broadband services to Hancock Co, KY.*

*Thank you,*

*Melissa Postlewaite*

My family struggles daily with internet service. It is either very slow or non-existent. We are very much in favor of KENERGY providing internet services in our area.

To whom it may concern:

I am a Kenergy client in western Daviess County and have limited WiFi capabilities. I have a student in the Daviess County Public Schools who will require online access so she can continue her education virtually as a result of coronavirus and no in person school for the unforeseen future. Last year she had to do a paper packet from school when in person learning stopped mid March. I am also working from home and am currently using a cellular hot spot with little success.

If a man can be placed on the moon, if the Titanic can be examined at the bottom of the ocean floor,

if a heart can be taken from one person and successfully placed into the body of another person, shouldn't it stand to reason that even rural America have decent WiFi access?  
Thank you for working to make it happen.

Sarah OBryan

To the Kentucky Public Service Commission:

I support the effort of Kenergy Corp. to ensure the availability of high-speed internet in all areas of Kentucky, specifically our rural communities. As a parent of former students and a staff member of the Daviess County Public Schools district, it is essential that we are able to connect all students to online learning and digital information, especially now as schools are conducting classes virtually. Every child has the right to a meaningful learning experience, and extending broadband services into the homes of every student is an important step in making that possible.

## Steve Burton
