Re: Broadband in Western Kentucky

Commissioners,

I am writing to show my support of Kenergy's broadband deployment project. I want regulated electric cooperatives to be able to provide high-speed broadband services to my community, just as municipals and TVA cooperatives do today. Our community has limited, if any, availability to reliable, high-speed internet. This critical infrastructure is essential to business, healthcare, education and quality of life.

Extending broadband services to rural areas is the modern-day equivalent of rural electrification in the 1930's. Electric cooperatives have existing infrastructure throughout our region, which makes a perfect fit to be a broadband service provider.

I am requesting your approval of Kenergy's request for a waiver, which will expedite this project in a timely manner, ensuring electric cooperatives can secure financing for the

buildout.

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Sincerely,

Adam Montgomery

To Whom It May Concern:

This email is being sent to communicate my support for Kenergy Cooperative to provide Broadband Internet services to its members. I am a current customer receiving service at 97 Bent Tree Lane, Kuttawa, in Lyon County, Kentucky, 42055. The number of Broadband Internet providers in this area is quite limited. I believe that the community would benefit greatly from having another Broadband Internet provider available to its residents.

Regards,
Angel Carrasquillo

To the Kentucky Public Service Commission:
I support the effort of Kenergy Corp. to ensure the availability of high-speed internet in all areas of Kentucky, specifically our rural communities. As a member of the Daviess County Public Schools district staff, it is essential that we are able to connect all students to online learning and digital information, especially now as schools are conducting classes virtually. Every child has the right to a meaningful learning experience, and extending broadband services into the homes of every student is an important step in making that possible.

Frankfort, KY 40602

Re: Broadband in Western Kentucky

Commissioners,

I am writing to show my support of Kenergy's broadband deployment project. I want regulated electric cooperatives to be able to provide high-speed broadband services to my community, just as municipals and TVA cooperatives do today. Our community has limited, if any, availability to reliable, high-speed internet. This critical infrastructure is essential to business, healthcare, education and quality of life.

Extending broadband services to rural areas is the modern-day equivalent of rural electrification in the 1930's. Electric cooperatives have existing infrastructure throughout our region, which makes a perfect fit to be a broadband service provider.

I am requesting your approval of Kenergy's request for a waiver, which will expedite this project in a timely manner, ensuring electric cooperatives can secure financing for the buildout.

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Sincerely,

[Chad Townsend Magistrate District #1 Webster Co. [REDACTED]]

I want to voice my support for Kenergy's proposal to expand broadband to their service territory. As the speed toward a digital world has increased, so has the need for our residents in Western Kentucky to have access to reliable internet service.

I hope you will approve their proposal.

Best regards,

Re: Broadband in Western Kentucky
Commissioners,

I am writing to show my support of Kenergy's broadband deployment project. I want regulated electric cooperatives to be able to provide high-speed broadband services to my community, just as municipals and TVA cooperatives do today. Our community has limited, if any, availability to reliable, high-speed internet. This critical infrastructure is essential to business, healthcare, education and quality of life.

Extending broadband services to rural areas is the modern-day equivalent of rural electrification in the 1930's. Electric cooperatives have existing infrastructure throughout our region, which makes a

perfect fit to be a broadband service provider.

I am requesting your approval of Kenergy's request for a waiver, which will expedite this project in a timely manner, ensuring electric cooperatives can secure financing for the buildout.

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Sincerely, Jeff & Dawn Fowler

Are you in support of Kenergy's broadband deployment project? Help us out by writing a letter of support to the Kentucky Public Service Commission!

Kenergy has filed a waiver with the Kentucky Public Service Commission and letters of support mean a great deal to our waiver application. If you're unsure what to write, just copy and paste the text below and send a letter to the address listed or an email to psc.info@ky.gov

Good afternoon,

Please see the attached letter of support for Case No. 2020-00215.

August 25, 2020

Kentucky Public Service Commission
211 Sower Boulevard
Frankfort, KY 40602

RE: Kentucky Public Service Commission-- Case No. 2020-00215

On behalf of Owensboro Community and Technical College (OCTC), I am pleased to extend this letter in support of Kenergy offering broadband services to its customers.

OCTC serves businesses and students in many counties of Kenergy's service area. In these unprecedented times, when remote learning is the main method of delivery, it is imperative that our students and industry incumbent worker trainings have reliable internet access to be successful. Many of our students and incumbent workers who live in rural counties do not have access to, or very reliable, internet service and must travel to find WIFI hot spots to gain access to do their coursework. Traveling to find reliable service is challenging for our students, especially those with young children, and many times leads to frustration to the point of the student dropping out of college or the incumbent worker not completing the training. This not only affects the student and their families, it affects our overall economic development.

OCTC student success is not only our success, but the community's success, and we appreciate the opportunity to support this proposal.

Sincerely,

A handwritten signature in black ink, appearing to read "Scott Williams".

Re: Broadband in Western Kentucky

Commissioners,

I am writing to show my support of Kenergy's broadband deployment project. I want regulated electric cooperatives to be able to provide high-speed broadband services to my community, just as municipals and TVA cooperatives do today. Our community has limited, if any, availability to reliable, high-speed internet. This critical infrastructure is essential to business, healthcare, education and quality of life.

Extending broadband services to rural areas is the modern-day equivalent of rural electrification in the 1930's. Electric cooperatives have existing infrastructure throughout our region, which makes a perfect fit to be a broadband service provider.

I am requesting your approval of Kenergy's request for a waiver, which will expedite this project in a timely manner, ensuring electric cooperatives can secure financing for the buildout.

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Sincerely,

Jack Whitfield, Jr.

Good afternoon,

My name is Nicolas Rich, and I'm sending you an email with an attached letter of support concerning Kenergy's broadband effort. This infrastructure is critical to our fellow residents in various realms of everyday life ranging from healthcare access to education. Access to information via the web is becoming just as essential as power to the home. Please support our effort in building a stronger economic community in western Kentucky by supporting this cause.

Re: Broadband in Western Kentucky

Commissioners,

The current internet provider options in my area of Kentucky (Lyon County) are incompatible with a modern, high-tech life. Not only can I not work from home effectively, I can rarely stream entertainment. I have friends with businesses that can't function properly because the internet speed and reliability are questionable at best, and another friend who works from home 100% of the time even prior to the pandemic and lives in the Eddyville city limits and can't get decent internet.

I am writing to show my support of Kenergy's broadband deployment project. I want regulated electric cooperatives to be able to provide high-speed broadband services to my community, just as municipals and TVA cooperatives do today. Our community has limited, if any, availability to reliable, high-speed internet. This critical

infrastructure is essential to business, healthcare, education and quality of life.

Re: Broadband in Western Kentucky
Commissioners,

I am writing to show my support of Kenergy's broadband deployment project. I want regulated electric cooperatives to be able to provide high-speed broadband services to my community, just as municipals and TVA cooperatives do today. Our community has limited, if any, availability to reliable, high-speed internet.

I am requesting your approval of Kenergy's request for a waiver, which will expedite this project in a timely manner, ensuring electric cooperatives can secure financing for the buildout.

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Sincerely, Robert & Regina DeYoung

Thankfully my job is allowing me to work from home to help with virtual learning for my 3 boys. Our internet is horrible and very expensive for what we receive. Only one person can be on at a time and all devices have to be turned off wifi. PLEASE!!! Before, internet was just seen as a want for entertainment purposes; Netflix, Disney + and gaming. Now it is a necessity for our jobs and all of our childrens education! It's how our teachers are communicating with their students!! We are in need of this in Hancock County and all though out Kentucky!!

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Dear Commissioners,
I would ask that you allow Kenergy to provide internet service to their customers in Western Kentucky.

My name is Teresa Kay Cheek, and I live at 970 Lamastus Road in Reynolds Station, KY

which is in Hancock County. I was the last of 15 at my job to be able to begin working from home 11 years ago because I had no access to internet at home in Hancock County. I was able to join some neighbors to speak with ConnectGradd and begin a petition which did result in our getting a tower in Boling Chapel area. The problem was that service was not very dependable. The addition of too many customers along with outdated equipment took its toll so I have had some satellite internet providers before now having a "hot spot". Connectgradd began as a project to help rural areas, but even they focus more on populated areas. Having dependable service (no matter the weather) that would allow better service such as streaming, gaming, etc. would be wonderful.

My children also struggled with school work prior to my having what internet service I could get. My son Logan moved to Owensboro only because he couldn't deal with my internet service. He plays games online while talking to high school and college buddies to keep in touch after graduating. He also likes to invest in stocks and also works from home during COVID-19. Logan said everything he does involves the internet.

Please allow Kenergy to provide customers internet because no other company is going to invest in our area. Hancock County residents and officials have tried to bring in internet providers for years. Kenergy already has electric poles to run the service, and they are a reliable company. Please consider all the times each of you use the internet during the day. What if you needed to look up something but there was a cloud that left you without service? What if your child was doing virtual schooling but you had to drive to a parking lot at school or a church to have internet?

It's 2020, and there is absolutely no reason anyone in the United States should not have the option to have internet where they live. As I mentioned earlier, nobody is going to provide service in the country. Please allow Kenergy to begin the project.

Thank you for your time,
Teresa Cheek

Our community has limited, if any, availability to reliable, high-speed internet. This critical infrastructure is essential to business, healthcare, education and quality of life.

Extending broadband services to rural areas is the modern-day equivalent of rural electrification in the 1930's. Electric cooperatives have existing infrastructure throughout our region, which makes a perfect fit to be a broadband service provider.

I am requesting your approval of Kenergy's request for a waiver, which will expedite this project in a timely manner, ensuring electric cooperatives can secure financing for the buildout.

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Sincerely,

Tracy & Teresa Travis

To whom it may concern,

I have been living in Robards KY for a month now. I recently moved from the city of Henderson where I was accustomed to high speed internet. Because of the pandemic I was forced to work from home. After checking with different companies for internet service only a few provided what I needed and even then it was fast enough for what I needed for work. I will be home for the next 7 to 8 months and the service I currently have is terribly slow. So slow that my employer had to request a hot spot which helped a little. I can't stream movies and Netflix - video quality is poor and buffers alot. Please I am begging you guys to allow Kenergy to provide this vital service to its existing customers...would be great blessing. I do use the internet to stream church services and that is of great importance to me and my family.

Thanks for the consideration. Praying this becomes a reality.

Troy

Existing Kenergy Customer.
