Re: Broadband in Western Kentucky

Commissioners,

I am writing to show my support of Kenergy's broadband deployment project. I want

regulated electric cooperatives to be able to provide high-speed broadband services to my community, just as municipals and TVA cooperatives do today. Our community has limited, if any, availability to reliable, high-speed internet. This critical infrastructure is essential to business, healthcare, education and quality of life.

Extending broadband services to rural areas is the modern-day equivalent of rural electrification in the 1930's. Electric cooperatives have existing infrastructure throughout our region, which makes a perfect fit to be a broadband service provider.

I am requesting your approval of Kenergy's request for a waiver, which will expedite this project in a timely manner, ensuring electric cooperatives can secure financing for the buildout.

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Additionally, we, the residents of rural western Ky, have been promised high speed broadband internet for decades with no progress. AT&T is the biggest let down. In our case, they ran a fiber optic cable 1 mile from our home but never developed it any further. We were continually being told "next quarter" whatever that meant. I've also been told, by technicians on the ground, that they will not service DSL in the very near future because they are abandoning the copper lines. This is most definitely needed, and quite frankly should have been accomplished a decade ago at least.

The time for you all to act is NOW. Please make this happen and clear the way for rural American citizens to have the same technology advantages as people in cities in our commonwealth.

Sincerely,  
Arvin Rhodes

My name is Cristal Bell. I live at 8822 Martin Martin Rd. Henderson, KY. I am in full support of Kenergy bringing High Speed Broadband to our neighborhood! As of right now we only have to options for internet. One through our satellite company. Which is outrageous in price and charges for data usage. They don't have unlimited data. And the other is Qwireless. Qwireless has unlimited data but we have the highest speed available and yet we have issues with streaming everyday, and it is always going out. In our household there are 5 people using the internet. So please Kenergy get on this ASAP. Make it unlimited data, affordable, and dependable!

Re: Broadband in Western Kentucky

Commissioners,

I am writing to show my support of Kenergy's broadband deployment project. I want regulated municipal electric cooperatives to be able to provide high-speed broadband services to my community, just as municipals and TVA cooperatives do today. Our community has limited, if any, availability to reliable, high-speed internet. This critical infrastructure is essential to business, healthcare, education and quality of life.

Extending broadband services to rural areas is the modern-day equivalent of rural electrification in the 1930's. Electric cooperatives have existing infrastructure throughout our region, which makes a perfect fit to be a broadband service provider.

I am requesting your approval of Kenergy's request for a waiver, which will expedite this project in a timely manner, ensuring electric cooperatives can secure financing for the buildout.

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Sincerely,

Joan Hayden  
President  
Daviess County Farm Bureau

I support Kenergy to provide broadband services. Our area is in desperate need of quality and reliable internet services. When we bought our house here in Timber Trails, it never dawned on us that we would need to ask if Internet Services are available. I have traveled through Europe and Central America and have better internet service than I do just on the outskirts of Owensboro.

In the time of Covid it has been even more of an issue with kids learning from home that we need a reliable internet service provider. We have worked with Spectrum for over a year to no avail to try to get them to support us!! We would be so glad to see a reliable provider here.

# Kenergy Broadband Letter of Support

August 25, 2020

Are you in support of Kenergy's broadband deployment project? Help us out by writing a letter of support to the Kentucky Public Service Commission!

Kenergy has filed a waiver with the Kentucky Public Service Commission and letters of support mean a great deal to our waiver application. If you're unsure what to write, just copy and paste the text below and send a letter to the address listed or an email to [psc.info@ky.gov](mailto:psc.info@ky.gov)

We appreciate you taking the time to write a letter of support!

We would like the public service commission to consider Kenergy request to add broadband services to their service network. We live in rural Union Co. Ky and the only options are dial up thru A T & T. We have no A T & T wireless coverage out here. We still have a land line. Our internet is thru our wireless verizon carrier. We do have a unlimited plan but after 30 GB it slows down. We have grandchildren who are now virtual learning and we can only do so many days before it slows down until we can not use our home wi-fi. We miss out of so many opportunities; streaming, online options, because of AFFORDABLE (limited) internet as result.

Extending broadband services to rural areas is the modern-day equivalent of rural electrification in the 1930's. Electric cooperatives have existing infrastructure throughout our region, which makes a perfect fit to be a broadband service provider.

I am requesting your approval of Kenergy's request for a waiver, which will expedite this project in a timely manner, ensuring electric cooperatives can secure financing for the buildout.

Thank you for your consideration of this important project, one that will positively impact my community and transform western Kentucky.

Sincerely,

Tonya Redfern  
2693 Sassafras Grove Road  
Sebree, KY 42455
