PSC Public Information Officer

I would like to submit my objection to the proposed AT&T cell tower to be built north of Hickory, Kentucky. There is already a cell tower 1/2 mile from that proposed location. Our farm is near the property where that tower would be located and I see no need for two towers that close together.

Respectfully yours,
Betty Whitlow

Subject: Case Number #2020-00270

Dear Public Information Officer:

I am contacting your office in order to register my objection to the proposed AT&T cell tower currently planned north of Hickory, Kentucky. Reference Case # 2020-00270

There is an existing cell tower located ~ .5 miles from the proposed site. Cell service coverage in this area is extremely reliable. The current tower is located on one of the highest elevations in Graves County. It is redundant to build 2 towers in the same area when other areas of the county suffer little to no coverage at this time.

Cell phone towers are relatively new and any long term damage due to RF waves is unknown. Additional towers in the same area increase the RF waves. We should strive to reduce where we can in addition to the fact that the towers are unsightly. Our farm is in this area and I would prefer not to look at 2 towers. We should manage our land resources wisely.

Thank you for taking my objection into account.

Regards,
Bethany Geurin
