RE: Case Number 2020-00290

Kentucky Public Service Commission:

I was recently informed by mail that those managing the sewer water in the area I have lived for the last 15 years have arbitrarily decided to raise the current monthly rate by 670%, AGAIN THAT IS 670 PERCENT!!! My service will NOT be improved, I was given NO notice of this upcoming change, and apparently have NO say in a 670 PERCENT INCREASE.

This amount of increase is obviously ridiculous and disgusting. What type of gross negligence would contribute to such an outrageous hike? I believe the homeowners in these areas should be compensated for decreased home values based on increased maintenance costs.

I do not support anyone who would sponsor this change, I will never vote for anyone who has anything to do with it, and am completely disgusted by anyone who does not fight to overturn it! I believe this decision should be reversed immediately.
