To Whom Concerned:

The notice of a rate increase is by far out of the question. I live in a place where the fumes from the compressor station at times makes it hard to breath. The E.P.A. shall be notified. My land has been raped by at least (5) different gas lines, one in which is the high pressure 20" line, also a computer tower. Needless to say it has destroyed this property. The way I see it I shouldn't have (free gas).

If you would fix the old lines you could save money. There is enough gas leaking in the air to furnish all of Eastern Kentucky.

So if you want to keep changing your name, don't put the burden on (us) the consumer we are not stupid!
