Subject: 2020-00349 KU

I am writing today to express my support of the residents and business owners in your constituency that are in opposition of the case number referenced in my subject line, with regards to proposed utility rate increases.

My company works in the energy efficiency field and have served KU customers seeking to become more energy efficient. Due to KU's rate structures and increasing costs, I have experienced consensus displeasure with KU and their services from existing customers.

Having worked with dozens of utility companies across the country, I can personally testify that KU's treatment of their customers is the most unfair that I have seen, and I stand in opposition of the proposed rate increase alongside the customers that I have served in the KU service territory.

Respectfully,

--

As a taxpayer in Kentucky, and a KU/LG&E customer, I am against ANY proposed residential rate INCREASES.

1. The county is just coming out of a pandemic. The economy is just starting to recover. We as a county aren't exactly sure if we are on the verge of another strange of Covid-19. NOW IS NOT THE TIME
2. The government just passed a relief bill for American workers. Apparently, the country needed the support. Why are we trying to make American suffer again by increasing their electric bill? Some Americans are still recovering from the inability to pay their mortgage/rent, not having money for FOOD to feed their children. NOW IS NOT THE TIME
3. Why are KU/LG&E customers responsible for the upgrades? What were the company's

profits over the last five years? What other options have been explored? How can KU/LG&E streamline their budget? Review their financial expenditures to reduce additional burdens on their customers. NOW IS NOT THE TIME.

Thank you for allowing me to voice my input. I can be contacted at [REDACTED].

Subject: 2020-00349 Kentucky utilities

To whom it may concern,

My name is Charles Bramble and I live at 225 South 46th street, Middlesboro, KY 40965. The reason for this email is to state that I oppose the proposed rate increase Kentucky Utilities has proposed.

As you know the past year and few months the world has been turned upside down because of the Pandemic. While the world is getting better it is still going to be years for everyone to recover. The last thing we need right now is a rate increase. ESPECIALLY in Southeast Kentucky which is one of the poorest areas in the country.

People in this area are struggling as it is to pay bills and afford food, we do not need another rate increase. This rate increase would also effect the non-profit agencies that use their

electricity. The more they pay for electric the less help they can provide to the needy people of this area. So please deny this request from LG&E/KU to increase the current rates.

I thank you for your time. Sincerely

Charles Bramble Jr

I am opposed to the current proposal by KU to raise rates again. I am particularly opposed any flat per-meter fee increases. My partner and I strive to use as little energy as possible to benefit both our wallets and the earth. With this proposal, our bill will go up 15% without us using any more energy. These proposed per-meter fees are more than double what KU customers paid nine years ago, and nearly double what LG&E customers paid in 2012.

Also, why should their disconnection fee go up \$9? I'd love to see the justification for that, but I am sure I never will. These proposals need to be spelled out in clear language and shared more widely with their customers. I have not seen anything about it in the correspondence I get from them. I learned about this through the KFTC website information, which many citizens are not connected to.

We should also have the right to install solar on our homes and businesses and receive a fair credit for that energy we are producing. These utilities want to force everyone to purchase

their solar shares, so they can reap all the benefits from renewables. We could use more skilled, high-paying jobs in Kentucky. Solar installation companies are an area of high growth for many states and could be here as well if utilities don't ruin the affordability.

It's bold to ask for these increases during a time when so many are unemployed or hurting due to the strains COVID has placed on many of us. The fact that for three out of the past four years KU/LGE have come to the PSC asking to again raise the rates show that they are confident the time and money they invest into filing these increases will pay off in having whatever they ask for approved, or mostly approved.

Thank you for reading my comment and considering everyday Kentuckians as you hear their case.

Subject: Opposition to credit reduction for KU/LGE

Hello, this email is in reference to case numbers:
KU 2020-00349
KPC: 2020-0074

I am writing to express my opposition to a reduction of 80% in the KU/LG&E credit paid for rooftop solar power and a 75% drop in the KPC service area. These proposed reductions will make it uneconomical for my husband and I to install net metering for our solar. We are about to go on on fixed incomes and installing net metering on our rooftop solar would be an important way for us to keep the costs of living in our home down.

Please do not approve these reductions.

Sincerely,
Linda Barnes
