Re: Gas and Electric Proposed Increases

Dear Commission:

Please tell me you are not as tone deaf as LG&E to the public health emergency we are surviving currently. To propose these outrageous increases of 11.6% for electric and 8.3% for gas as many people suffer is unconscionable. If you really want to send a message to LG&E, you should reduce rates by these percentages until they can demonstrate their overhead and stewardship as a monopoly are reasonable. The \$11.74 increase to an average resident has lasting impact on those with fixed incomes and the timing is atrocious.

I hope you receive several more comments from the citizens of Kentucky subject to this cram down as it can not stand. I appreciate your consideration.

Signed,

Jay H. Trumbo
