Yall,

PUBLIC SERVICE  
COMMISSION

My name is Shauntrice Martin and I am a single mom living in the West End of Louisville. I am a small business owner. I was born & raised in Kentucky.

I cannot afford another rate increase.

To keep it all the way real, what we really need is a rate DECREASE. I am so disgusted with the idea that LG&E is threatening our livelihood in the middle of a pandemic. The KY PSC is supposed to protect us from harmful energy policies. We need protection from the \$150/yr increase. Bernheim and our beloved state landmarks need respect & protection from PPL/LG&E/KU. If yall don't protect us, that's trash.

The proposed hikes hurt low income families. We need you to OPPOSE rate increases. I am calling on the public service commission to stand with Kentuckians. These proposals are unfair and they

disproportionately hurt racially & economically marginalized people. Densely populated communities will be hit harder.

They want to increase the basic service charge which means that no matter how much energy they conserve, their bills will still be high. The PSC should have our backs instead of siding w/investors.

I want the PSC to STOP the rate increase immediately. Consideration of the proposed changes should be deferred until they meet w/ the consultant and present findings to the larger community. We should be able to review, debate, and weigh in on any potential decision. It's only right.

Do the right thing.  
Word to Radio Raheem.
