Gerald & Lynda Gray, 1529 Helena Road, Flemingsburg, Ky. My husband, and I have been resident at our current address for 34 years. The land that surround your solar project is prime agricultural land in Fleming County. I was raised up on a dairy and a tobacco farm. We worked our land to have a home and pay our bills. We took much pride in our land, and love the land. This is why we strongly object to your project.

Utility Name: Fleming-Mason Energy

State the nature of your concern: Acciona applied to the PSC for a construction permit to build a solar energy project in Fleming County in 2020. More importantly they have recently applied for a deviation from current setbacks relating to solar developments which are currently "1000ft from property lines and 2000ft from any residential neighborhood school,

hospital or nursing home facility” per KRS 278.704. Acciona’s proposed setback limits are 200ft from a residence or just 50ft from a property line. As a Fleming county resident that this will directly affect I am adamantly against this. Most of my neighbors have not even been made aware of this and are surprised and against it also. This should not happen without all affected being aware and informed of this action.

Have you contacted the utility about the problem: No

Phone number where you can be reached: [REDACTED]
Home phone:
Utility Name: Acciona

State the nature of your concern: I am in opposition of Acciona setback deviation in solar panel plant in Fleming county. I am opposed to the destruction of tillable farmland. Property values in the community and near the plant will decrease significantly. Toxic waste with nowhere to dispose is a hazard for the environment. Solar panel plants should be in industrial

zoned areas and on low quality land. Noise levels are above and beyond the level of ambient sound. Cadmium is harmful to lungs, kidneys. If broken these toxic chemicals will leach into the land and water. Panels are a fire hazard if hit by lightening.
