Case number 2021-00154

This is a concerned citizen of Martin County, Ky. This concerns ^{as} the rate increased of our water. In the past few years our water has been increased about four times, they are wanting to increase by 12% this time. My husband is a retiree, our income never increases it stays to same since he retired in the year 2000, this is becoming a great burden. We are paying \$50.00 to 80.00 a month for a household of two. The increase and the water we now receive doesn't meet this kind of increase. We are buying our drinking water now. We would appreciate if someone would look into this matter. We are concerned this rate increase just keeps going. We cannot pay for people who won't pay, we cannot pay for more improvements when nothing is fixing our problem. We need help.
