No to a rate increase on Martin County Water!!

PUBLIC SERVICE
COMMISSION

As a concerned citizen of Martin co. Ky, I wish to contest the rate increase on our unsafe & dirty water. If you go to a shoe store & pick out a nice clean pair of shoes & then you open the box they give you only to find a dirty pair of shoes that's not at all what you purchased!! Imagine the furry!! The anger!! The distrust in that shoe store.

Here in the crooked hills of Martin co. Corruption has stolen the clean safe water that we all deserve. That we pay big money for but never seem to get.. Things were not done correctly "For The People." Angry is an understatement when they suggest another rate increase. The people of Martin co. are tired, angry & pushed to the point of thinking of leaving because of such high water rates and high taxes. This is not such a wealthy county anymore and we are over paying for dirty water & milky water that you can't cook with or brush teeth with!

The main reason for my displeasure of a rate increase is that Ky is at 21.3% poverty rate. We have 5% unemployment rate and rank 47th in child poverty. Who in their right mind would agree to push such a heavy burden on the people of Martin co.?? You have the opportunity to help us in Martin county. We are asking you to to deny the rate increase for "The People" of Martin County!! Please help us!!
