

I am requesting that AEUG Mason Solar, LLC have a public meeting prior to the Public Service Commission accepting the application for a certificate.

At the recent Planning & Zoning workshop on 7/7/2021, a motion was passed by the Planning & Zoning board that any merchant or IPPS who have known signed leases in the county are requested to have a per KRS 278.704(6)-(8) and KRS 278.706.

I have learnt this past June that an informational meeting was held on 3/4/2021. I did not receive any notice regarding this meeting and live within 1/3<sup>rd</sup> of a mile of a proposed boundary. To my knowledge this event was not published in any local newspaper, or on any local governmental website. Additionally, I have also learnt that a map of the area was presented, this so called map if one can call it that has no legend, no location of the proposed plant, no site boundaries and or buildings. It does not show the location of any residential neighborhoods, residential structures, and no public and private parks.

The reason I am writing this request is it appears that the process referenced by the Kentucky's Electric Generation and Transmission Siting Process, KRS 278.704(6)-(8) and KRS 278.706 as outlined in the Kentucky Resource Council publication 20-02B is not being followed, therefore I am asking that the recommended processes be followed as documented by the state.

Jason Shepcke

PS. I am now mailing this because when I submitted it electronically on Tuesday Morning at approximately 7:57 am after I had registered with the PSC website I did not get a response from you all now in over 41 hours. It is about 1:18 am in the morning on Friday July 23, 2021.
