TO KRS 278.700 AND 807 KAR 5:110)	

ORDER

On March 8, 2021, Rhudes Creek Solar, LLC (Rhudes Creek) filed a notice of intent to file an application for a Certificate of Construction for an approximately 100-megawatt solar facility to be located near Cecilia, Hardin County, Kentucky. The notice of intent also indicates that the application will contain a request for a Certificate of Construction for a 1.5-mile nonregulated 138 kV transmission line that will connect the proposed solar facility to a substation to be constructed by Kentucky Utilities Company at that company's Black Branch to Hardinsburg 138 kV transmission line. On March 12, 2021, Rhudes Creek filed a motion to approve form of public meeting. The motion requests approval for a proposed format of a public meeting that would be conducted to conform to the current public gathering limitations and social distancing requirements imposed during the COVID-19 State of Emergency in Kentucky. Rhudes Creek states

that the proposed public meeting format would satisfy the public meeting requirement set forth in KRS 278.706(2)(f) and requests a declaration regarding the same.

In particular, Rhudes Creek proposes the following process in conducting a public meeting as required by KRS 278.706(2)(f):

1. All representatives and experts making presentations for Rhudes Creek Solar at the public meeting will do so via a live “virtual” platform (such as Zoom);
2. The virtual platform used for the public meeting will allow members of the public to view the public meeting live, on-line, without cost, by registering with a valid email address, and will allow participants to ask representatives of Rhudes Creek Solar questions about the project, either orally or in writing;
3. The public meeting will be projected for viewing “live” at the Cecilia Ruritan Club, 422 Federal Street, Cecilia, Ky. 42724 in Hardin County at which a representative of Rhudes Creek Solar will be present and a mechanism will be provided for any in-person attendees to address questions to representatives of Rhudes Creek Solar;
4. Additionally, prior to the start of the “formal” meeting that will be streamed live, representatives of Rhudes Creek Solar will be socially distanced at stations at the Ruritan Club and be available to answer questions and present maps and other documents for viewing; and
5. All notices of and advertisements for the public meeting will (i) specify how the public can access and participate in the public meeting via the on-line virtual platform, (ii) encourage the public to participate in the public meeting virtually, not in-person, (iii) specify that in-person attendance at the public meeting will be consistent with guidelines and directives from the CDC and the Office of the Governor in effect at the time of the meeting regarding such meetings, including, but not limited to, social distancing and the requirement that masks be properly worn at all times, and (iv) specify that in order to allow for social distancing, the number of attendees at the in-person meeting will be limited and spaces allocated to the

public on a first-come, first-served basis, and include instructions for how to sign-up for the available spaces.¹

Rhudes Creek asserts that the proposed public meeting format provides the public with multiple options to attend the meeting and receiving information about the proposed solar facility and therefore satisfies the requirements of KRS 278.706(2)(f), while accommodating the health and safety concerns raised by the current COVID-19 State of Emergency. Rhudes Creek further asserts that it will publish notice of the public meeting and mail notice to all owners of property adjacent to the proposed solar facility as required by KRS 278.706(2)(f)(2).

Having reviewed the motion and being otherwise sufficiently advised, the Siting Board finds that the protocols and process proposed by Rhudes Creek to schedule and conduct its public meeting is consistent with the language and intent of KRS 278.706(2)(f). We note that KRS 278.706(2)(f) requires a completed application to include, among other things, a report identifying the various public outreach engagements performed by the applicant prior to the filing of an application. In particular, KRS 278.706(2)(f) provides, in relevant parts, as follows.

(2) A completed application shall include the following:

.....

(f) A complete report of the applicant's public involvement program activities undertaken prior to the filing of the application, including:

1. The scheduling and conducting of a public meeting in the county or counties in which the proposed facility will be constructed at least ninety (90) days prior to the filing of an application, for the purpose of informing the public of the project being considered and receiving comment on it;
2. Evidence that notice of the time, subject, and location of the public meeting was published in the

¹ Motion to Approve Form of Public Meeting at 2–3.

newspaper of general circulation in the county, and that individual notice was mailed to all owners of property adjoining the proposed project at least two (2) weeks prior to the meeting;

The process and protocols proposed by Rhudes Creek for its public meeting strikes a balance in being able to provide information on the solar project development in Hardin County and to receive comment from the public on the project as required by KRS 278.706(2)(f) and doing so in a manner that takes into account the current public gathering limitations and social distancing requirements imposed by the COVID-19 State of Emergency in Kentucky. Accordingly, Rhudes Creek's motion should be approved as proposed. The Siting Board expects the details of the public meeting that will be reported in the application will mirror the format that has been proposed in the motion.

IT IS THEREFORE ORDERED that:

1. Rhudes Creek's motion to approve form of public meeting is granted.
2. Within three days of the publication of the public notice, Rhudes Creek shall submit a copy of the newspaper advertisement that will notify the public of the proposed public meeting format.
3. Within three days of the mailing of the notice to adjacent property owners, Rhudes Creek shall submit a copy of the notice of the public meeting format that is required to be provided to owners of property adjacent to the solar project.
