

FEB 10 2021

Feb. 8, 2021 PUBLIC SERVICE
COMMISSION

Public Service Commission:

I am asking the Public Service Commission of Kentucky to reject the Proposed Environmental Surcharge requested by Kentucky Power Company - Case Number 2021-00004.

Kentucky Power Company just received a rate hike (approved by this Commission) just a few months ago. Now we are expected to pay for their Environmental Compliance plan. Is there no end to sticking it to the consumer? Kentucky Power is a business and they need to use the profits of the company to pay for their business expenses.

People are suffering enough with Covid expenses, being out of work, and just trying to survive. Electric bills are high enough with fees and surcharges. Families are struggling to pay their bills now.

As a representative of the people
of Kentucky, Please stand up for
us and reject the Kentucky Power Company
Proposed Surcharge.

Thank you,
Virginia Rowe
