CASE NO. 2021-00008

To:

Public Service Commission

ATTN:

Executive Director

RECEIVED

FEB 12 2021

PUBLIC SERVICE  
COMMISSION

Concerning the 190 ft. Cell Phone Tower Proposed for the Callaboose Community in Wolfe County, I believe it would be Reckless and Inresponsible for Appalachia Wireless to build a tower in this location and also reckless and Inresponsible for the Public Service Commission to Approve the Plan due to Radiation Concerns. I have read about the dangers of living near a cell phone tower and it says a cell phone tower should be no closer than 1300 ft. from the local population. This tower would be much closer than 1300 ft.

I am a 76 year old Viet-Nam Veteran and to this date I have had 6 skin cancers which I believe to be related with Agent Orange from my service in Viet-Nam but I also believe Radiation compounds my skin cancer problems. I live near the proposed cell phone tower site. If a tower of this size is needed in this area I suggest finding another location and not gamble with the health and safety of the people living nearby.

Page 2

There is A Cell Phone Tower NEAR this  
Proposed Tower Site. At this time.
