Quincy, KY 41166

Dear Sirs

I am writing to you about the water rates in my district.

The Harrison Water District wants to raise our water rates 18.5%.

- (1) The majority of our residents are retired & elderly and have small Social Security checks.
- (2) The water quality is very poor. To my knowledge the water plant has made no improvements in quality of our water for a long period of time.
- (3) If you place a glass or small bowl in the kitchen sink and fill it with plain water and leave it over night it has a foul odor the next morning.
- (4) Most of the residents buy their water to drink and cook with.

I don't think this is fair to all our citizens to have our bills raised.

I ask that you reconsider this. Not only for myself but for all the people in our district.

If you doubt what I say about the quality of our water talk to some of the residents of our district.

Sincerely,

Alicia Bivens
