PUBLIC SERVICE  
COMMISSION

Case No: 2021-00154

To: Kentucky  
Public Service Commission,

05-08-2021

My name is Royh. Spaulding and I know the Citizens of Martin County, Kentucky do not need another Water rate increase. Most Citizens are unemployed or on a Fixed income, and most Citizens are buying cases of water to drink and to use in other ways. As you should know we are in a Pandemic situation, and a lot of Citizens are moving away from here, our county water situation needs help badly, but the citizens of Martin County, Kentucky can not afford another rate increase. I do believe The Martin County Water Department already received three rate increases last year and the Citizens of Martin County, Kentucky could not afford that and it put a lot of Citizens in a worse situation. Maybe you do not care about the Citizens of Martin County, Kentucky. but I do, and how much money is enough, how many rate increases

does a Water company need.  
The Citizens of Martin County, Kentucky  
already has it bad enough, and  
most Citizens do not even drink  
the water.

I have seen my water white, black,  
brown and it has a very strong  
chlorine odor and yes I'm afraid  
to drink it, but sometimes I have  
to use it.

I can not afford another rate  
increase and most of the Citizens  
of Martin County, Kentucky can't  
afford it either.

Thank You  
Roy L. Spaulding
