Sept. 20, 2021

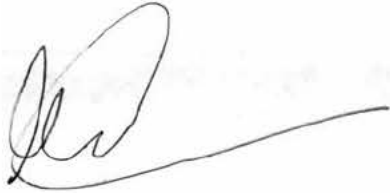

Public Service Commission

I am enclosing copies of the emails I sent regarding case # 2021-00170. I wrote the first one in July and did not get an acknowledgement of receipt.

I sent the 2nd email recently.

I am now sending a hard copy with photographs. Agriculture is zoned A2. We drive big equipment and frequently impatient drivers make life more difficult than it should be.

We have many one lane roads and narrow state roads. Industry doesn't fit the area.

Peggy Parker

## PASS INTERCEPTION

*Terry Prather/Staff*

Mason County Sheriff's personnel responded to a non-injury accident involving two vehicles Monday morning on Kentucky 324 east of May's Lick. Shelia McVey, driver of a 2005 Hyundai attempted to pass a John Deere tractor driven by Charles Williams and struck the rear tire of his tractor as it was attempting to make a left turn into a driveway.

This is our tractor.

Fw: Case number: 2021-00170

PSC Public Information Officer,

I am writing to express my concerns regarding the proposed Industrial Solar changes to my area.

I am a farmer in May's Lick. May's Lick is a small farming community in Mason County. We have agricultural traffic, Amish horse & buggy traffic, delivery trucks & vans and impatient drivers with cars that drive way too fast.

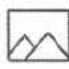

Our roads can't handle the current load!

If Industrial Solar is permitted in this area and heavy equipment is allowed to travel on these small roads or our county one lane roads- it will make it impossible to safely take our agricultural equipment on the road. Everyone's safety will be at risk.

Please say no to industrial solar in this area.

Thank you,

Peggy Parker
