Subject: Case Related Question Case#2021-00214

Regarding Atmos Energy Corporation request for price increase.

I fail to understand why the monthly base charge for residential customers needs to increase by 18%.\$248.16 per.year for the privilege of being connected to and buying natural gas which is already excessive let alone being increased to \$292.80 per year.

With regard to the residential monthly commodity charge increases there is more than ample natural gas supplies in the US.Suppliers are gouging domestic users by shipping supplies off shore.Even with that there is still no justification for an increase.

TO SUMMARISE:

How do you justify having to pay almost \$300 per. year to be connected to a natural gas supply?

How do you justify an increase in natural gas prices when there is more natural gas supplies in the US than in past years?
