Case # 2021-00235

8/1/22

Russellville Solar Opposition

Mark and Connie Hall

515 Marian Acres Rd., Russellville, KY 42276

What would be the estimated cost to decommission Russellville Solar be at present economic cost?

Do the landowners have a security bond to cover this cost, if a default occurs during this 40 year anticipated operation?

Who oversees and inspects the TVA substation and battery storage facilities for noise impact and ground water contamination or are they left to self- regulations with no third party inspections?

Will the buildings be decommissioned also and can the 6 acres be turned back into tillable crop land? I seriously doubt it nor will the land the panels are on.

All of the bases need to be covered by the sighting board to see that this land is not destroyed.

Which is what we believe is going to happen. People are not looking at the whole picture nor covering all the important issues nor all the impacts on homeowners and the environment this project will be causing.

On our property we have a couple of hawks that have been nesting for the past few of years, bluebirds/finches/cardinals/humming birds/ honey bees and numerous animals that roam the land. All are very important to the environment. What affect is it going to have on the wildlife in our area???

Will the birds die if they fly over the panels? I have no idea what harm all the toxics that those panels contain will have on the birds/animals and us humans that live close to them will have.

I am sure no one else does either.

We beg of you to consider another place for the panels. That this is not the time nor the place to experiment with prime land - producing crops/food and energy for our county and nation.

Sincerely,

Mark and Connie Hall

God Bless America and Logan County!!

God Bless America and Logan County!!

I should have also mentioned the dangers of large trucks and increased traffic on our little road.

J Montgomery Road

Small country road where you may have to stop and or pull over when you meet another vehicle.

It has curves and hills and there are many persons that walk the road.

There are several children on bikes and such. People walking their dogs.

This whole idea of a Solar thing in our commuty has me scared for everything!!

Thank you for your consideration and time.
