PUBLIC SERVICE  
COMMISSION

RE: 2021-00312

To Whom This May Concern:

As a resident and concerned citizen of Hardin County, I would like to request a local meeting to be held in Hardin County concerning case #2021-00312 and the related solar projects. As a resident, I would like to exercise this privilege and would like to address the Public Service Commission concerning these projects.

It is my understanding that much is unknown about industrial solar to include the clean-up of these massive projects. In addition, industrial solar projects threaten to destroy the best and most productive farmland in Hardin County, Kentucky. Also, they appear to not have much of an economic impact on our community and most of the energy will go elsewhere. Also, industrial solar poses a threat to our water quality and wildlife, among other issues.

Our local Planning and Development Board of Adjustments denied the Conditional Use Permit based on our county's Comprehensive Plan. This was appealed in Circuit Court and remanded back to Planning and Zoning. It is the belief of myself and others in our community that these projects are the opposite of a safe and reliable service at a reasonable price based on other state's experiences.

Thank you for your time and I look forward to an opportunity address these projects.

Sincerely,

*Anna Atkins*

RE: 2021-00312

To Whom This May Concern:

As a resident and concerned citizen of Hardin County, I would like to request a local meeting to be held in Hardin County concerning case #2021-00312 and the related solar projects. As a resident, I would like to exercise this privilege and would like to address the Public Service Commission concerning these projects.

It is my understanding that much is unknown about industrial solar to include the clean-up of these massive projects. In addition, industrial solar projects threaten to destroy the best and most productive farmland in Hardin County, Kentucky. Also, they appear to not have much of an economic impact on our community and most of the energy will go elsewhere. Also, industrial solar poses a threat to our water quality and wildlife, among other issues.

Our local Planning and Development Board of Adjustments denied the Conditional Use Permit based on our county's Comprehensive Plan. This was appealed in Circuit Court and remanded back to Planning and Zoning. It is the belief of myself and others in our community that these projects are the opposite of a safe and reliable service at a reasonable price based on other state's experiences.

Thank you for your time and I look forward to an opportunity address these projects.

Sincerely,

  
1335 Tanned Hill Rd
