PUBLIC SERVICE  
COMMISSION

To Whom It May Concern:

My name is Stephanie Daniel and I am writing this letter as my parents are Terry and Kimberly Newton, who live at 2589 Blue Bird Rd, where the tower that Tillman Infrastructure has proposed a 100 X 100 lot to build a monopole to service the area of Rough River. After watching the meeting that was recorded at Rough River State Park Lodge to prevent the tower from being placed in the location that has been proposed, I wanted to write voicing my thoughts as I was not able to attend due to work. The reasoning being that myself, my 3 sisters and all of our children are left the property when our parents are no longer with us and we intend to keep said property in our family for many years to come. I wish to state that the Nicolai family's main concern is that it will devalue there home, property, and business. I wish to state that I see there concerns but many things can devalue the price of there property. The Economy is the main reason and that is something no one can have control over. There is no way to tell what can affect their value of their home as no one can predict what the future holds. If anything the tower would allow them to have access to more educational resources for their children, as they are homeschooled and benefit with running there farm on many social websites. The safety of their children should be their main concern. The tower will allow them to be able to call for help when they need it. The Nicolai's' have contacted Kim and Terry to have them check there cameras while Kim and Terry were out town to check if there children were over at there home when they couldn't locate them and thankfully they were able to access them with as weak as the service was. Unfortunately, they are not satisfied with the location but after many evaluations from Tillman Infrastructure this was going to be the best location to service many people without hurting any trees in the process. The driveway up to the tower has it's own accessible drive that is connected to the Newton's property and it will not touch the Nicolai's property. I believe the value of there property will have no more affect then the everyday economy. Their entire family, as well as many other families and business owners will receive way more benefits by having the tower then to not having one at all. I

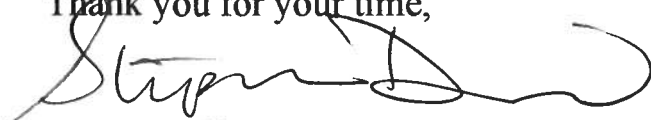

would also wish to state that we have better service in our area with AT&T then we do with any other cell service so our parents have to be able to get in touch with us and our extended family making it to where we have to have them as a cell phone provider. Unfortunately you cannot please everyone but you can prevent many of individuals from having bad outcomes in an emergency situation. Lives matter more than the value of a piece of dirt.

Thank you for your time,

Stephanie Daniel
